

"I support strong Net Neutrality rules under Title II of the Federal Communications Act of 1934. Based on the ruling in *Verizon Communications Inc. v. FCC* (2014), Title II classification is the only way to maintain enforceable Net Neutrality rules by the FCC. ISPs have repeatedly show a willingness to abuse their control over data in their networks, and work against a fair playing field and consumer interests. Voluntary agreements and self regulation are not sufficient to maintain a free and open internet. Please maintain Net Neutrality under Title II. And seriously, how many times do we have to do this?"
